- MSO software downloads the GPS & Billing Log file for analysis and reference
- Provide power to G-mouse via RS232 Interface for reliable cable connection
- Support of any "G-Mouse" following the NMEA 183 Standard
- Support of GGA and RMC Standard Protocols

Typical applications for GPS Digital Signage:

- City Tour Bus
- Public Bus
- Taxi
- Train

Easy-to-use GPS solution for Digital Signage

The easy-to-use user interface of MSO software allows the user to define a zone by coordinates, and assign a playlist for this zone. So the Network Player can play different Playlists depending on geographic position.

STEP 1. Create a zone

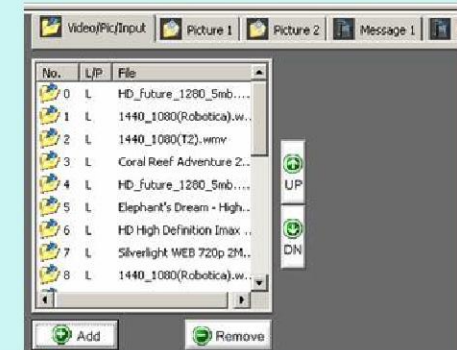

STEP 2. Enter coordinates for the zone

You can use any navigation software to check the coordinates

STEP 3. Define playlist

Define playlist for the zone

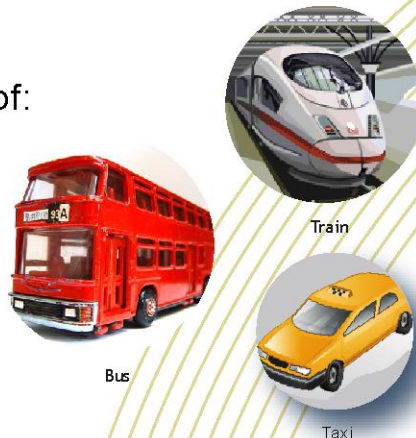

GPS package including:

- + 1 pcs G-Mouse (SIRF III technology)
- + 1 pcs RS232 to G-Mouse cable

GPS Support of:

- + NMEA-183
- + GGA
- + RMC

STEP 4. Transfer

Transfer the setting of coordinates and media files to Network Player
